

## 6A 8 Level Group Incentive Calculation

### Monthly Calculation

#### Calculation #1

The Incentive per 8 Level Group sale has been changed according to rank as listed below:

6A2	€14 / per unit sale
6A22	€16 / per unit sale
6A23	€17 / per unit sale
6A24	€18 / per unit sale
6A25	€19 / per unit sale

#### Calculation #2

The €28 multiplier has been applied to the number of Open Volume Sales in this new computational method. In addition, when ten or more Open Volume Sales are accumulated, €21 additional dollars will be added to the Open Volume Incentive per sale Incentive totaling €49 per unit.

Here is a summary of the computational method used for the Incentive.

- One 8pt group sale require for 6A2 in the month, two 8pt group sales for 6A2-2,
- A = total amount of 6A's 8 level Sales Volume multiplied by Distributor Rank Amount (6A2=€14, 6A24=€18)
- B = total amount of your open volume sales multiplied by €28 base plus €21 if 10 or more Open Volume sales are achieved.
- A + B = your 6A 8 Level Monthly Incentive.

Here are examples.

Your Rank	Total Open Sales	Total 8 Level Group Sales	8 Level Incentive	Open Sales Incentive	Total Incentive
6A2	0	200	€0	€0	€0
6A2	3	100	€1,400 (€14/per)	€140 (€28/unit)	€1,540
6A2-2	8	400	€6,400 (€16/per)	€224 (€28/unit)	€6,624
6A2-3	15	700	€11,900(€17/per)	€735 (€49/unit)	€12,635
6A5-2	25	500	€8,000 (€16/per)	€1,225 (€49/unit)	€9,225

This calculation is hereby effective September 2009.
